

Wee Folk Solution

ingredients needed for the solution:

6 CUPS OF WATER

1 CUP DRIED LEMON VERBENA

½ CUP OF CHICKS AND HENS PETALS

(ABOUT 90 TO 100 LEAVES)

MILLET SEEDS

BRING TO BOIL

The First three ingredients listed above in a non-metal pot. Turn down the heat and simmer until reduced to half the volume (3 ½ to 4 cups). Strain and store in glass container in a refrigerator.

This procedure takes about 2 hours. (Divide ingredients in half for a smaller amount).

NOW

Pick a time when you can be home and then place a small amount to the Millet on a cup saucer; being sure to cover the inner circle of the saucer cup ring (about 1 to ½ Tablespoons). You will need one saucer for each entry door of the residence that is used (outside). Since other animals enjoy Millet, be sure to cover saucers with netting or some type of strainer.

Once this is completed, do **NOT** add more millet to the saucer (one time only).

11 HOURS LATER

Take a small brush or Q-tip and apply the solution in one straight line running completely from one side to the other of your:

a/ WINDOW SASHES

b/ CHIMNEY OPENINGS (AREA ABOVE SCREEN GRATE ON THE OUTSIDE, FACING ROOM)

IMPORTANT

Solution must be applied on the above places between the 11th & 12th hour (must be done before the 12th hour), after the millet is placed outside. Application **must continue once a month** on the **exact date and time of the original time for a 6-month period.**

EXAMPLE

March 6 at 12:00 am – placed, seed outside. 11:00 am apply solution to sashes, etc.

(Next application) April 6 and for a Total of six (6) months.

It takes six months for the openings of the inside of the house to close. That means, if you miss an application, **you will have to start from the very beginning.**
